

Calibra - Life -

FOOD FOR
THE ENTIRE LIFE
OF YOUR DOG

— WHO WE ARE? —

We are enthusiastic pet owners as well as veterinarians who **love to come up with the best possible food** for your – and our – pets.

When we were developing the Life product line, **we carefully fine-tuned each individual recipe** using all the knowledge we have acquired to date. We work not only with veterinarians but also with nutritional experts.

We want only the best for our four-legged friends, and our vision is to support a long, satisfying relationship between each pet and its owner. The Czech Republic, where we produce our pet foods, is, after all, a nation of passionate dog lovers.

— WHY LIFE? —

All Life recipes are **complete**, containing everything your pet needs to thrive. By this, we mean the ideal ratio of proteins, carbohydrates, and all nutritionally beneficial additives, which are fine-tuned for each age and weight category – from puppies to senior dogs. In short, the product line is designed to **nourish and protect your dog throughout its entire life.** It's simply **Life...**

A dog has different needs at different stages of life – and that's especially true with nutrition. During the junior stage, the need is for **proper growth and development** of the organism and **supporting immunity**. In adulthood, and throughout its life, **good digestion** is essential, as is the proper functioning of the organism and **preventing disease**. For senior dogs, balanced energy intake in relation to energy output is important.

We haven't forgotten about the differences in the needs of differently sized dog breeds. We pay special attention to choosing the most appropriate and beneficial additives, as well as to the size of the granules.

HIGHLY BENEFICIAL ADDITIVES

LACTOBACILLUS ACIDOPHILUS IN LIFE

Lactobacillus acidophilus is a probiotic - live bacteria - commonly found in natural intestinal microflora. As part of the ecosystem of the digestive tract, it helps with:

- **Digestion,**
- **Maintaining digestive balance,**
- **Strengthening the protective barrier of the intestinal wall** against pathogens and toxins and their absorption. It also **positively affects digestion and therefore the immune system.**

Because other factors (medications, improper feeding, toxins, etc.) can lead to imbalances in intestinal microflora, it's a good idea to supplement with probiotics regularly.

We add probiotics to Life specifically because of their superior effects on the organism. We use an inactivated form, labeled as *Lactobacillus acidophilus* HA-122 (inactivated). In this form, it is a non-living probiotic lactobacillus strain with paraprobiotic effects. This means that it contains the same components as live lactobacillus bacteria commonly found in the intestines and displays similar effects.

The primary **advantage of this inactive form** of lactobacillus is that, unlike the live form, **it is not necessary to protect its viability**, whether during the food production process or in the acidic stomach environment.

CALIBRA DOG LIFE STARTER & PUPPY LAMB

HAS THERE BEEN A HAPPY EVENT
IN YOUR CANINE FAMILY?

We have developed the most appropriate food for puppies (up to 3 months of age), which we can also recommend for pregnant and nursing female dogs. Dry food with high quality lamb protein and low grain content – only rice – provides the **necessary nutrients** that puppies need **during this important stage** of their development. Animal proteins make up 90% of the total protein content. The recipe is hypoallergenic. Due to puppies' sensitive digestion after weaning, the food is, of course, very easily digestible. We've added prebiotics and lactobacillus, which help with proper digestion and, together with β -glucans, also **help strengthen the immune system** of the puppy. This high quality food is enriched with salmon oil to care for the coat and skin and selected vitamins and minerals for the correct functioning and development of the puppy's entire organism and immune system.

SPECIAL ADDITIVES

SALMON OIL 3% – a source of unsaturated omega-3 (EPA, DHA) fatty acids necessary to support the physiological functions of the skin and coat and to improve their quality. It also has anti-inflammatory properties.

VITAMINS & CHELATED MINERALS (highly utilizable organic forms of minerals) – for the proper function of the organism, prevention of illnesses, and strengthening of the immune system.

FRUCTO-OLIGOSACCHARIDES AND MANNAN-OLIGOSACCHARIDES (FOS, MOS) are prebiotics that support intestinal microflora and the proper function of the digestive system and that strengthen the immune system, **β -GLUCANS** stimulate and support the immune system. **LACTOBACILLUS ACIDOPHILUS** (inactivated) – has a paraprobiotic function and a positive effect on the immune system.

CALIBRA DOG LIFE JUNIOR SMALL BREED CHICKEN

TIME FLIES AND YOUR PUPPY IS NOW
A JUNIOR DOG...

For young dogs (3–12 months) of small breeds (1–10 kg), we've developed a food with high quality chicken protein to help support the animal's proper development. This dry food is easily digestible and hypoallergenic, with a low grain content – only rice. This dry food for small breed junior dogs is enriched with prebiotics and probiotics to support the proper functioning of your dog's digestive tract. Thanks to its balanced mix of vitamins and chelated minerals, it guarantees **the best of care for your young dog's development and overall immunity**. The high nutritional value of the food ensures your dog's proper growth, with 85% of its total protein content coming from animal sources. Salmon oil helps **care for the skin and glossy coat** of your small furry friend.

SPECIAL ADDITIVES

SALMON OIL – a source of unsaturated omega-3 (EPA, DHA) fatty acids necessary to support the physiological functions of the skin and coat and to improve their quality. It also has anti-inflammatory properties.

VITAMINS & CHELATED MINERALS (highly utilizable organic forms of minerals) – for the proper function of the organism, prevention of illnesses, and strengthening of the immune system.

CALIBRA DOG LIFE JUNIOR MEDIUM BREED CHICKEN

MAKE SURE YOUR JUNIOR DOG
GROWS UP STRONG AND HEALTHY

When your dog is no longer really a puppy, we recommend switching to a food for medium breed (10–30 kg) junior dogs (3–15 months) with chicken. The animal protein source content ensures the high nutritional value necessary for your canine companion's proper growth. In this recipe, it makes up 85% of the total protein content. The dry food is hypoallergenic and easily digestible, with a low grain content – only rice. Your dog will lick its bowl clean. Thanks to the high quality ingredients and carefully selected additives, the food has a **positive effect on the growth and overall development of your dog**. We've added prebiotics and probiotics for a healthy, happy tummy and to **strengthen your dog's immune system**. Salmon oil is excellent for ensuring healthy skin and a glossy coat. And last but not least, the added vitamins and minerals support the proper functioning of your pet's entire organism.

SPECIAL ADDITIVES

SALMON OIL – a source of unsaturated omega-3 (EPA, DHA) fatty acids necessary to support the physiological functions of the skin and coat and to improve their quality. It also has anti-inflammatory properties.

VITAMINS & CHELATED MINERALS (highly utilizable organic forms of minerals) – for the proper function of the organism, prevention of illnesses, and strengthening of the immune system.

CALIBRA DOG LIFE ADULT MEDIUM BREED CHICKEN

THERE WILL BE NOTHING BUT CRUMBS LEFT
AFTER ENJOYING THIS DELICIOUS CHICKEN

Your dog will love this dry food with high chicken content. The recipe is designed for adult medium breed dogs (10–30 kg). It's based on high quality animal proteins, which make up an exceptional 90% of the total protein content, and it is also low in grains (only rice). The recipe is hypoallergenic and contains interesting beneficial additives. We've also added prebiotics, β -glucans and probiotics, which help **establish ideal digestion as the foundation of your dog's healthy immune system**. The detoxification effects of Mojave yucca help reduce gassiness and stool odor. We've also chosen a suitable mix of vitamins and chelated minerals to ensure the proper functioning of your dog's entire organism, as well as to strengthen the immune system. The recipe, therefore, significantly supports your pet's active life.

SPECIAL ADDITIVES

VITAMINS & CHELATED MINERALS (highly utilizable organic forms of minerals) – for the proper function of the organism, prevention of illnesses, and strengthening of the immune system.

FRUCTO-OLIGOSACCHARIDES AND MANNAN-OLIGOSACCHARIDES (FOS, MOS) are prebiotics that support intestinal microflora and the proper function of the digestive system and that strengthen the immune system.

MOJAVE YUCCA – contains chlorophyll, trace elements, vitamins, saponins and polyphenols. It has detoxifying effects, positive influence on gastrointestinal tract, reduces flatulence and the smell of excrements.

β -GLUKANS stimulate and support the immune system. **LACTOBACILLUS ACIDOPHILUS** (inactivated) – has a paraprobiotic function and a positive effect on the immune system.

CALIBRA DOG LIFE ADULT LARGE BREED CHICKEN

DRY FOOD WITH CHICKEN NEVER DISAPPOINTS

For adult large breed dogs (over 30 kg), we've got a larger size granule with a high chicken meat content. The food's nutritive value fulfills even the most demanding requirements of large dogs. Not only is it low grain (only rice), but 85% of the total protein content comes from animal sources. It's easily digestible, tasty, and hypoallergenic. To ensure that large dogs have the proper care for their joints and stressed musculoskeletal system, we've added **chondroprotectives to nourish and protect joint cartilage**. To help ensure the proper functioning of your dog's digestive tract, we've added prebiotics and Mojave yucca extract, which acts as a detoxicant and reduces gassiness and stool odor.

SPECIAL ADDITIVES

CHONDROPROTECTIVES (chondroitin sulphate and glucosamine) – nourish cartilage and slow the degeneration process.

VITAMINS & CHELATED MINERALS (highly utilizable organic forms of minerals) – for the proper function of the organism, prevention of illnesses, and strengthening of the immune system.

FRUCTO-OLIGOSACCHARIDES AND MANNAN-OLIGOSACCHARIDES (FOS, MOS) are prebiotics that support intestinal microflora and the proper function of the digestive system and that strengthen the immune system.
MOJAVE YUCCA – contains chlorophyll, trace elements, vitamins, saponins and polyphenols. It has detoxifying effects, positive influence on gastrointestinal tract, reduces flatulence and the smell of excrements.

Composition: chicken protein (40 %), rice (28 %), brewer's rice (8 %), poultry fat (7 %, preserved with tocopherols), apple pulp dried (5 %), hydrolyzed poultry protein (5 %), yeasts, hydrolyzed chicken liver (2 %), salmon oil (2 %), prebiotics (mannan-oligosaccharides 120 mg/kg, β -glucans 100 mg/kg, fructo-oligosaccharides 70 mg/kg), glucosamine (260 mg/kg), dried rosemary & thyme (200 mg/kg), chondroitine sulphate (160 mg/kg), Mojave yucca (80 mg/kg), *Lactobacillus acidophilus* HA – 122 inactivated (15×10^9 cells/kg).

Analytical constituents: crude protein 25 %, crude fat 14 %, crude fibers 3 %, crude ash 6.2 %, moisture 9 %, calcium 1.4 %, phosphorus 1.1 %, sodium 0.3 %, magnesium 0.09 %, omega-3 fatty acids 0.3 %, omega-6 fatty acids 1.7 %, protein of animal origin from total content of protein 85 %.

Metabolizable Energy value: 3,750 kcal/kg

PACKAGE SIZE:
2.5 kg, 12 kg

CALIBRA DOG LIFE ADULT LARGE BREED LAMB

A BIG PORTION OF LAMB FOR A BIG DOG

All adult large breed dogs (over 30 kg) will love the taste of this hearty dry food with lamb. The hypoallergenic composition with low grain content (only rice) is suitable even for sensitive digestive systems. The larger granule size is adapted to the physiological needs of large dogs. The animal protein sources, which make up 80% of the total protein content in the recipe, include high quality lamb. We've added **chondroprotectives to provide continuous care for the stressed joints** of large breed dogs. Prebiotics and Mojave yucca extract ensure the proper functioning of the digestive tract by supporting intestinal microflora and significantly reducing gassiness in your canine companion's intestines.

SPECIAL ADDITIVES

CHONDROPROTECTIVES (chondroitin sulphate and glucosamine) – nourish cartilage and slow the degeneration process.

VITAMINS & CHELATED MINERALS (highly utilizable organic forms of minerals) – for the proper function of the organism, prevention of illnesses, and strengthening of the immune system.

FRUCTO-OLIGOSACCHARIDES AND MANNAN-OLIGOSACCHARIDES (FOS, MOS) are prebiotics that support intestinal microflora and the proper function of the digestive system and that strengthen the immune system.
MOJAVE YUCCA – contains chlorophyll, trace elements, vitamins, saponins and polyphenols. It has detoxifying effects, positive influence on gastrointestinal tract, reduces flatulence and the smell of excrements.

2.5 kg, 12 kg

CALIBRA DOG LIFE SENIOR SMALL BREED LAMB

REAL LAMB FOR SMALL EXPERIENCED GOURMETS

This dry food for older small breed dogs (up to 10 kg and over 7 years old) is highly digestible and hypoallergenic with a **balanced nutritional composition**. We've fine-tuned the ratio of high quality lamb and a low grain content to **satisfy the increased demands of older dogs' sensitive tummies**. The animal source proteins, which make up 85% of the total protein content, help ensure the recipe's high nutritional value. For healthy skin and a beautiful coat, we've added a dose of salmon oil. We've chosen the right vitamins and minerals for your dog's overall health, while β -glucans and lactobacillus strengthen its immune system.

SPECIAL ADDITIVES

SALMON OIL – a source of unsaturated omega-3 (EPA, DHA) fatty acids necessary to support the physiological functions of the skin and coat and to improve their quality. It also has anti-inflammatory properties.

VITAMINS & CHELATED MINERALS (highly utilizable organic forms of minerals) – for the proper function of the organism, prevention of illnesses, and strengthening of the immune system.

FRUCTO-OLIGOSACCHARIDES AND MANNAN-OLIGOSACCHARIDES (FOS, MOS) are prebiotics that support intestinal microflora and the proper function of the digestive system and that strengthen the immune system, **β -GLUCANS** stimulate and support the immune system. **LACTOBACILLUS ACIDOPHILUS** (inactivated) – has a paraprobiotic function and a positive effect on the immune system.

CALIBRA DOG LIFE SENIOR MEDIUM & LARGE BREED CHICKEN

A BALANCED MEAL WITH CHICKEN FOR A GOURMET'S REFINED TASTES

For senior medium and large breed dogs (over 6 years old and over 10 kg), we've developed a dry food that has **nutritional values optimized** just for them. It's a highly digestible food that will suit the sensitive digestion of older dogs. The recipe contains high quality chicken protein and a low grain content (rice). Animal source proteins make up 85% of the total protein content. The food is enriched with **chondroprotectives for the intensive care of stressed joints** and the musculoskeletal system of big older dogs. For optimum digestion and proper digestive tract functioning, we've added prebiotics as well as Mojave yucca extract, which has detoxifying effects and reduces gassiness. A carefully chosen mix of vitamins and minerals has positive effects on your dog's overall health, and together with other beneficial additives, helps strengthen its immune system

SPECIAL ADDITIVES

CHONDROPROTECTIVES (chondroitin sulphate and glucosamine) – nourish cartilage and slow the degeneration process.

VITAMINS & CHELATED MINERALS (highly utilizable organic forms of minerals) – for the proper function of the organism, prevention of illnesses, and strengthening of the immune system.
